Introduction

London is a global centre for commerce, finance, technology and the creative industries. Insider London goes beneath the surface of that success through carefully arranged visits to organisations shaping their sectors.

We meet the people behind established brands, specialist firms and emerging companies. Presentations and discussions are adapted to the academic or professional interests of each group, connecting classroom knowledge with real decisions.

Participants encounter practical business models, technologies, career paths and industry challenges through direct conversation and observation.

A company visit can strengthen a study programme, refresh a corporate meeting or provide a focused introduction to London's business ecosystem.

Our partnerships span digital platforms, finance, investment, artificial intelligence, cybersecurity, marketing, creative production, sustainability, manufacturing and the built environment.

Programmes can combine company visits with workshops, walking tours and facilitated discussion to create a coherent learning experience for student or corporate groups.

Meet the global car-sharing marketplace that connects local vehicle hosts with people who need a car. Turo operates across the United States, Canada, the United Kingdom, France and Australia, offering access to vehicles without owning the fleet itself.

Explore how the platform manages trust, safety, pricing, insurance and customer experience while creating income opportunities for hosts. The visit brings marketplace economics and the changing relationship between access and ownership to life.

Revolut has become one of the best-known challengers to traditional financial services by building a mobile-first platform around speed, international use and rapid product development.

Gain insight into how fintech businesses balance innovation with regulation, security and customer trust. The visit explores product design, data, international growth and the skills required in a financial company that continues to evolve at pace.

Guinness Ventures

INSIDER
— LONDON —

Guinness Ventures backs UK scale-up companies across business services, healthcare and consumer sectors. Since 2010, it has invested more than GBP 340 million into over 200 EIS, VCT or IHT-qualifying businesses.

Learn how an investment team sources opportunities, assesses management and growth potential, structures funding and supports portfolio companies. The visit connects financial analysis with the relationships and judgement behind long-term investment decisions.

Redhedge Asset Management is a specialist investment manager focused on market-neutral, relative-value credit strategies. Its approach combines quantitative modelling with detailed sector knowledge to identify price inefficiencies and manage credit risk.

Meet professionals working in fixed-income markets, see the tools and information that support their decisions, and explore how global events can affect credit pricing. The visit introduces disciplined risk control and the human judgement behind professional trading.

K3 Advantage

INSIDER
— LONDON —

K3 Advantage provides transaction, tax and deal-advisory services to growing businesses, investors and management teams. Its advisers combine financial due diligence, commercial experience and data analytics to support acquisitions, investment and growth decisions.

The visit reveals how professionals turn complex financial and operational information into clear advice. It also explores careers in corporate finance, the importance of communication and judgement, and how AI is reshaping analysis without removing the need for commercial understanding.

Faculty is an applied AI company that helps organisations use artificial intelligence to improve decisions and performance. Its work spans demanding environments including healthcare, energy, business and government.

Explore how teams move from a real operational problem to a deployed AI system, and why technical capability must be matched by domain knowledge, safety and responsible delivery. The visit also introduces pathways from STEM study into commercial AI through Faculty's Fellowship and project work.

Gensyn is building decentralised infrastructure through which machine intelligence can train, verify, trade and evolve. The network explores whether distributed computing and open participation can make advanced AI development more accessible.

The visit examines the cost of AI compute, how work performed by different machines can be verified, and what happens when models or evidence disagree. It offers a lively introduction to open-source development, prediction markets and the challenge of creating trust between autonomous systems.

CyPro helps high-growth companies reduce cyber risk and build security capabilities that can scale with the business. Based at Canary Wharf, its specialists work across cyber strategy, risk assessment, implementation, monitoring and long-term security operations.

Discover how organisations decide what to protect first, prepare for incidents and meet changing regulatory expectations without slowing growth. The visit also opens up the range of technical, analytical and client-facing careers available in cybersecurity.

Twin Insights

INSIDER
— LONDON —

Twin Insights connects occupancy, security, fire, facilities and asset data in one live digital twin. Instead of treating each building system separately, the platform creates a shared operational view for faster and better-informed decisions.

Explore how live building information can improve safety, maintenance, energy performance and long-term asset value. The visit connects Internet of Things technology with the practical challenge of managing individual buildings and international portfolios.

Agribot applies artificial intelligence, satellite information and precision-agriculture techniques to help identify problems early, improve efficiency and optimise crop yields.

The visit explores how data can support decisions in one of the world's most important industries. It connects emerging technology with food security, sustainability and the practical challenges of moving from an experimental idea to a scalable product.

Transmission

INSIDER
— LONDON —

Transmission is a global independent B2B marketing agency working across brand, demand and sales. It combines data, technology and creative thinking to develop campaigns for major international clients.

Go behind the scenes of business-to-business marketing and see how strategy, audience insight, content and performance measurement fit together. The visit explores agency careers and the challenge of producing creative work that also delivers commercial results.

Topham Guerin

INSIDER
— LONDON —

Topham Guerin operates in the fast-moving world of strategic communication and digital campaigning. Its teams use audience insight, creative content and rapid response to shape how political and corporate organisations communicate.

The visit reveals the decisions behind a modern campaign. Messages are tested, content is adapted to different platforms and teams respond when the public conversation changes by the hour. It is also an opportunity to examine the ethical responsibilities attached to influence.

Wiser is a global employer-branding and early-talent agency. It helps organisations understand why people join and stay, then turns that research into employer strategies, recruitment campaigns, careers websites, films, social content and campus programmes.

Discover how creative and commercial teams work together to change perceptions of an employer. The visit connects brand strategy with workplace culture, candidate experience, measurement and the growing influence of AI on how people research potential employers.

Holywell Studio

INSIDER
— LONDON —

Located in the heart of Shoreditch, Holywell Studio is a boutique recording and creative space founded by artist-producer Jennings Couch. Since 2021, it has grown from a dedicated music-production facility into a versatile hub for recording, mixing, mastering and collaborative projects.

Known for its intimate atmosphere and carefully curated design, Holywell combines professional audio equipment with a welcoming environment. The visit explores both the craft and the business behind contemporary music production.

New Genre

New Genre is a global design and technology studio creating strategies, brand systems, digital products and scalable experiences. Its work sits at the meeting point of strategy, design and technology.

Meet a multidisciplinary team and explore how an emerging idea is translated into a coherent identity and practical digital experience. The visit considers creative process, collaboration, client relationships and the skills needed to build distinctive work in a fast-changing market.

Wonder Studios

INSIDER
— LONDON —

Wonder Studios is an AI-native entertainment company founded by filmmaker Justin Hackney and marketplace entrepreneur Xavier Collins. It brings human creative judgement together with generative tools across film, advertising, music video and original intellectual property.

Explore how AI is changing development, production and distribution without removing the importance of taste, storytelling and creator ownership. The visit also examines new studio models, creator communities and the careers emerging where technology meets entertainment.

With more than 70 years of experience, Bywaters provides recycling, waste-collection and resource-management services designed to reduce environmental impact and support a circular economy.

Visit its operations to see how sorting technology, data and process design improve resource recovery and reduce waste sent to disposal. The experience connects everyday business activity with the larger challenge of measuring and delivering credible environmental performance.

Fashion Enter

INSIDER
— LONDON —

See the clothing-manufacturing process at close range, from digital pattern preparation and cutting to sewing and quality control. Fashion Enter demonstrates how UK production can combine commercial speed with skills and traceability.

Explore how computer-aided design can reduce fabric waste, how digital systems improve accountability and why ethical production depends on both technology and people. The visit makes supply chains, manufacturing economics and sustainable fashion tangible.

Berkeley Group

INSIDER
— LONDON —

Berkeley Group builds homes and neighbourhoods across London, Birmingham and the South of England, with a particular focus on regenerating complex brownfield land into long-term places.

The visit examines how planning, design, construction, public space, nature and community engagement are coordinated across a major development. It provides a practical view of project delivery and the trade-offs involved in creating homes, infrastructure and sustainable neighbourhoods at scale.

Fintech for the Future Workshop

INSIDER
— LONDON —

Designed for corporate groups, this workshop showcases emerging ideas from the UK's fintech ecosystem. Participants meet a carefully selected group of businesses applying technology to major financial and operational challenges.

The session moves beyond general innovation language to examine customer problems, regulation, data, security and viable business models. Previous themes have included AI-enabled security, digital assets and new forms of financial infrastructure.

Music Production and Media Workshop

INSIDER
— LONDON —

In this interactive workshop designed specifically for creative individuals, you'll learn how a song is developed from start to finish, from group brainstorming to voting for the theme or topic to music exploration.

The post-production process is a main theme in this workshop. You'll receive a quick briefing on what steps would be taken if the song were to be released, including distribution, release plan, marketing, branding, visuals and sync.

Join us for an unforgettable experience with Holywell Studio and take your creative skills to the next level.

Venture Capital Workshop

INSIDER
— LONDON —

Work with Blue Lake VC to experience how an early-stage investor evaluates a startup. Participants assess the problem, market, founding team, traction, business model and potential for growth rather than relying on the pitch alone.

Teams build an investment thesis, identify the main risks and decide whether they would invest. They then defend that decision and receive feedback from practitioners who work with international and immigrant founders building technology companies in the UK.

Business Model Canvas Workshop

Let loose your inner entrepreneur. This practical workshop introduces the decisions involved in creating and running a business through an accessible one-page Business Model Canvas.

Participants connect customers, value proposition, channels, operations, partners, costs and revenue before building and presenting their own model. The format makes it easy to test assumptions, see how one decision affects another and improve an idea through discussion.

Entrepreneurship AI Workshop

INSIDER
— LONDON —

Turn a real customer problem into a testable AI-enabled business idea. Participants decide where artificial intelligence creates genuine value rather than adding technology for its own sake.

Working in teams, they define the user, value proposition, data and resources required, likely costs, risks and route to market. The session finishes with a concise pitch and feedback on whether the concept is useful, viable and responsible.

Bio-Lab Workshop with Low Tide Labs

INSIDER
— LONDON —

Work with Low Tide Labs to explore the chemistry and design potential of algae and seaweed-derived materials. Students handle alginate and learn how controlled changes in composition can transform a liquid mixture into a flexible biomaterial such as algae yarn.

The practical experiment makes biochemistry tangible, linking molecular structure and cross-linking to applications in skincare, food, drug delivery and sustainable materials. No prior laboratory experience is required - curiosity and careful observation are enough.

Defining Leadership Workshop

This interactive programme develops practical leadership skills through scenario-based exercises, group challenges and guided reflection. Participants explore decision-making under pressure, effective communication and team dynamics through realistic business situations.

The workshop blends theory with hands-on activity to build confidence, adaptability and strategic thinking. Content can be tailored to the group's goals, including influencing, negotiation, leadership styles and the people skills needed to deliver results.
